

Week 2 — Platform Case Analysis

Today's focus

- Analyse one digital platform through HCI interaction principles
- Evidence claims with screens / steps, not opinions alone
- Produce a short analytical note for peer critique

Roles

Role	Name
Facilitator	
Note-taker / screenshot lead	
Presenter	

Activity 1 — Choose & scope (15 min)

Field	Notes
Platform	
Primary task under review (one task only)	
Device / viewport used	
User assumed (novice / returning / expert)	

Activity 2 — Four-lens analysis (50 min)

Complete each row with **observation** → **implication**. Cite a screen or step.

Principle	What we observed	Implication for the user
Visibility — can the user see the system state and options?		
Feedback — does every key action confirm success / failure?		
Affordance — do controls look like what they do?		
Constraint — what prevents error or wrong paths?		

Activity 3 — Severity ranking (20 min)

Pick the **top 3** issues. Rank 1 = most harmful to task success.

Rank	Issue (one line)	Principle hit	Suggested fix (one line)
1			
2			
3			

Activity 4 — Share-out prep (15 min)

Presenter writes a 90-second script:

1. Platform + task
2. Strongest finding (with evidence)
3. One recommended fix
