

Week 10 — High-Fidelity Prototype Development

Today's focus

- Raise fidelity: components, styles, transitions
- Keep clickable flows tied to the Week 9 task path
- Avoid decorative work that does not serve the primary task

Roles

Role	Name
Facilitator	
Design system / styles lead	
Interaction / prototype lead	
QA (click-through tester)	

Activity 1 — Scope lock (15 min)

Field	Notes
Prototype tool	
Screens in scope today (max)	
Out of scope (explicit)	
Share link / file name	

Activity 2 — Components & styles (35 min)

Define a minimal system before polishing screens.

Token / component	Decision	Applied on screens
Type scale (H1 / body / caption)		
Colour roles (primary / danger / muted)		
Button styles (primary / secondary)		
Form fields / errors		

Activity 3 — Transitions & micro-interactions (25 min)

Only where they clarify state.

Interaction	Trigger	Feedback to user	Needed? (Y/N)

Activity 4 — Clickable flow QA (30 min)

QA walks the primary task **without coaching**. Log friction.

Step	Expected	Observed	Severity H/M/L	Fix owner
